

"Platina allows the quick and easily produced information which fully indicates that we have control over our documents, processes and that our personnel have the right training for their Duties"

Probi

Organisations within regulated environments face managing high volumes of documents and data within complex organisational structures and a diverse set of users.

Platina meets these requirements with pre-configured workflows as well as powerful tools that allow administrators to adapt

and enhance the system on an ongoing basis whilst senior management have a clear view with a personalised reporting dashboard.

Available on premise, within a private cloud and within a BYOD environment.

Key Features

- ✓ **Futureproofed**
Powerful tools for the System administrator limit the vendor reliance
- ✓ **Visual reporting**
configurable dashboard and reporting suite
- ✓ **User adoption**
Multi-browser intuitive front end enabling user adoption
- ✓ **Enterprise platform**
A single scalable platform to manage all your ECM and compliance requirements
- ✓ **Reduces Risk**
Allows multiple IT systems to be replaced by a single compliant platform
