

Long-Term Archive

by Formpipe

"Structured data archiving is the ability to index, migrate and protect application data in secondary databases or flat files located on lower cost storage for policy-based retention"

Gartner

Long Term Archive is the most flexible long term digital data preservation tool available. LTA provides easy archiving and its simple and powerful search tool delivers the retrieval of digital information over time, whilst retaining the original integrity of the content regardless of the starting digital formats.

LTA brings compliant record retention, permission driven access, confidentiality, data spoliation and destruction with full audit trail guaranteed for up to 50 years and eliminates the chance of being a data hostage.

Key Features

- ✓ **Guaranteed Storage**
of multiple file types
- ✓ **Ease of Input**
Manual or automated from multiple systems
- ✓ **Ease of View**
powerful permission engine
determines access with full audit trail
- ✓ **Ease of Retrieval**
permission driven by single document
or batch
- ✓ **Long Term Archiving**
solution and also a short term
migration
support tool

Long-Term Archive

by Formpipe

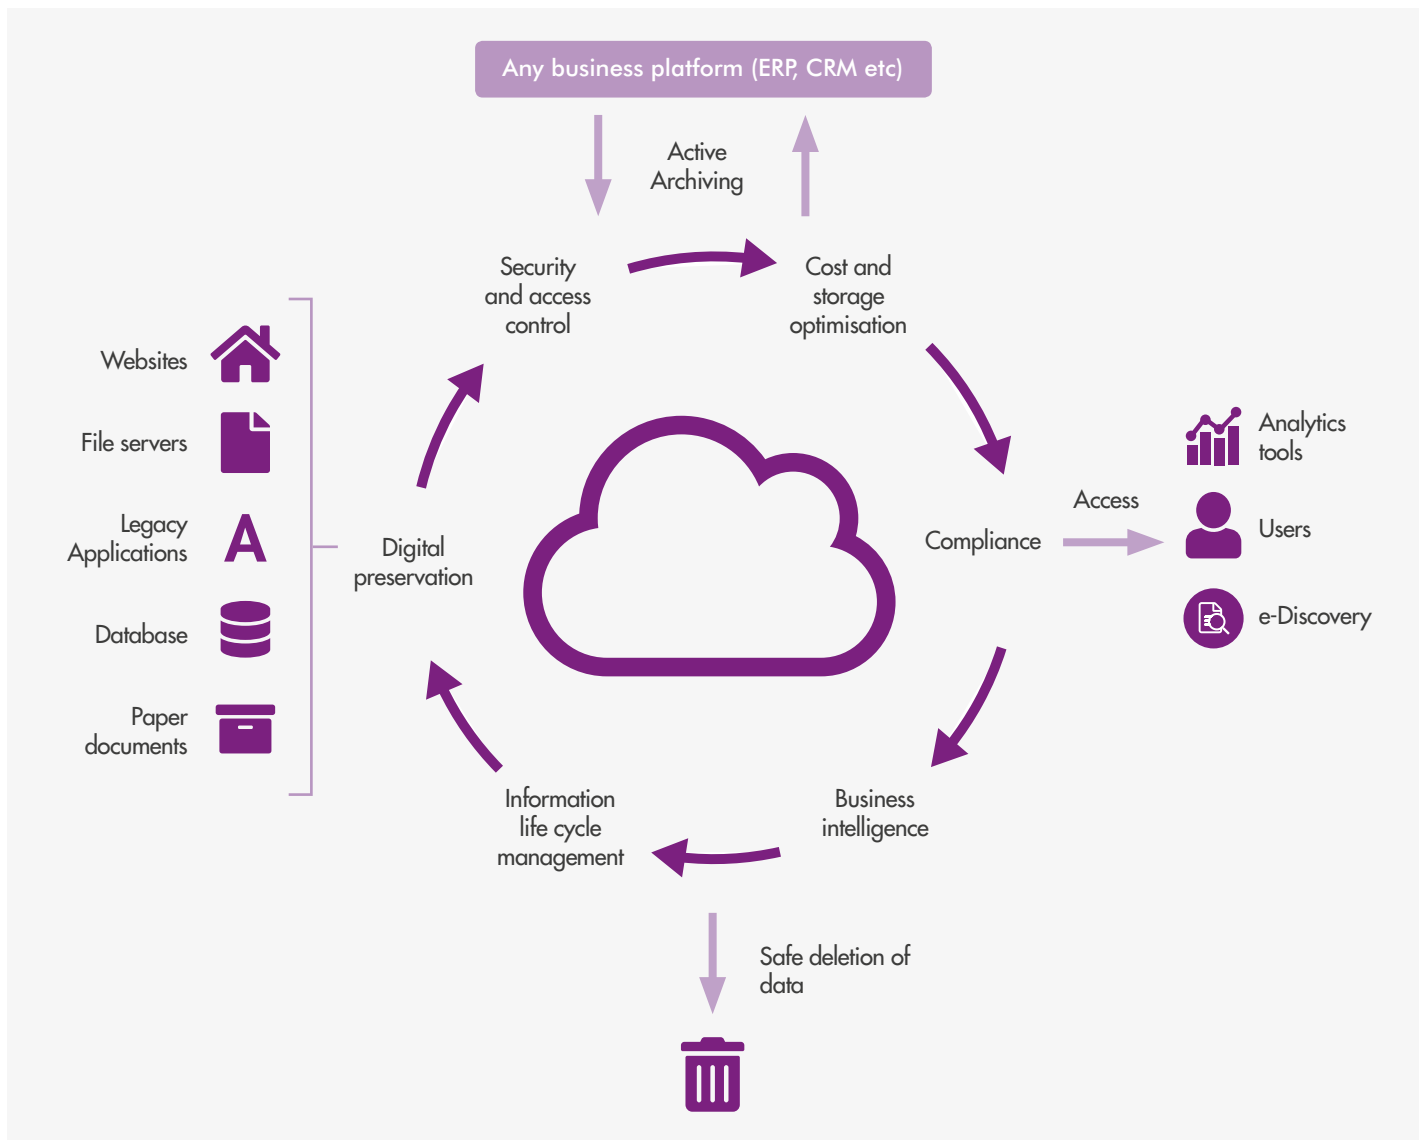

50%

By 2020, 50% of all current applications in the data center will be retired.

LTA is the solution to being able to retire these systems whilst retaining the data and ensuring GDPR compliance. In doing so it can answer a number of challenges an organisation faces.

Challenges

- ✓ Getting Complaint (with GDPR etc.)
- ✓ Moving to the cloud
- ✓ Reducing operational cost
- ✓ Enhancing performance
- ✓ Minimising risk
- ✓ Handling data growth
- ✓ Accessing data
- ✓ Gaining insight
- ✓ Managing mergers and acquisitions
