

# Create and deliver reports with Lasernetet for Microsoft Dynamics 365

## ABOUT LASERNET FOR DYNAMICS 365

Owned and developed by Formpipe, a Microsoft Gold Partner, Lasetnet has unrivaled integration with Microsoft Dynamics 365 to create and deliver reports in any format, removing the need for complex SSRS requirements.

Lasetnet is deployed on AppSource and is sold and supported through a certified network of global partners.

## WHAT WE OFFER

Lasetnet removes the need for programming in SSRS when generating reports out of Dynamics 365.

Drag-and-drop functionality enables users to quickly create, modify, control, disseminate, and archive content-rich, branded documentation across an entire organization (regardless of size) for print and electronic distribution.

On-premises, hybrid, and in the cloud, Lasetnet is available on all Dynamics 365 releases, ensuring complete peace of mind knowing you are future proofed.

Lasetnet uses advanced cloud technology to overcome printer configuration issues. Lasetnet can drive any printer, even if the printer is not directly accessible.

Lasetnet provides the ability to employ many different output channels including paper, email, fax, XML, UBL, and PDF.

With document distribution driven through Microsoft Dynamics 365, Customer A can receive a printed document while Customer B gets a PDF file attached to an email, all at the click of a button.

Generating documents from F&O, CE, BC, and more, Lasetnet gives you one central Azure-enabled tool for design.

By taking data from all areas of Dynamics seamlessly, you can have your invoice sales data generated from finance. Everything is centrally controlled to ensure consistency.

## WHAT OUR CUSTOMERS ARE SAYING

*“We looked at a number of vendors but found that Lasetnet was the only system capable of giving us straightforward solutions to some complex technical problems, whilst its integration with Microsoft Dynamics simply couldn’t be matched.”*

—Regis Litre, Chief Information Officer, Marc Jacobs

# Microsoft Dynamics 365

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

## KEY USE CASES

### SALES

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

### SERVICE

Understand your customers better and respond more quickly by accessing internal and external relationship data.

### FINANCE AND OPERATIONS

Increase your return on investment with Microsoft's agile and efficient cloud solution.

### TALENT

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

### MARKETING

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.

## WHY MICROSOFT DYNAMICS 365

**Modern applications** that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

**Unified data and processes** that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

**Intelligence** that delivers actionable insight. Data in the new world includes social, relationship, and productivity information, in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real time with expanded analytics, predictive algorithms, and automated AI.

**An extensible environment** that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.
