

Use Long-Term Archive for long-term archiving and preservation best practices

ABOUT LONG-TERM ARCHIVE FOR DYNAMICS 365

Owned and developed by Formpipe, a Microsoft Gold Partner, Long-Term Archive is a proven, robust, and well-established digital data preservation platform that works effortlessly with Microsoft Dynamics 365 from your everyday interface or via a separate browser.

WHAT WE OFFER

Our connector allows Dynamics 365 users to post directly from their everyday Dynamics interface to a defined archive within Long-Term Archive.

Using defined metadata, the report is stored within a named archive outside the Dynamics 365 system, while the actual documents are preserved following ISO standards.

Benefit from better management reporting and respond to financial information requests by using Long-Term Archive's powerful search and retrieve functions.

Find data relevant to a specific account, territory, product, or date range quickly, comprehensively, and in human-readable format.

Let Dynamics 365 be just the start of your preservation journey—learn how we can help you save significant costs by moving legacy system data to a single, proven preservation platform.

We follow the OAIS model and ISO standards to deliver best practices within Long-Term Archive.

Long-Term Archive is available within an Azure environment. Azure storage is just one of the locations available for your document, data, and object storage.

This allows our product to ensure we deliver regulatory compliance and reduced costs, with great flexibility and scalability in the future.

WHAT OUR CUSTOMERS ARE SAYING

“Long-Term Archive offers a standardized way to archive all our documentation for long-term preservation. This couldn't have been any better!”

—Lars Naslund, Senior IT Manager, Vinnova

Microsoft Dynamics 365

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

KEY USE CASES

SALES

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

SERVICE

Understand your customers better and respond more quickly by accessing internal and external relationship data.

FINANCE AND OPERATIONS

Increase your return on investment with Microsoft's agile and efficient cloud solution.

TALENT

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

MARKETING

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.

WHY MICROSOFT DYNAMICS 365

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information, in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.
